!!! IMPORTANT INFORMATION: PLEASE READ BEFORE INSTALL

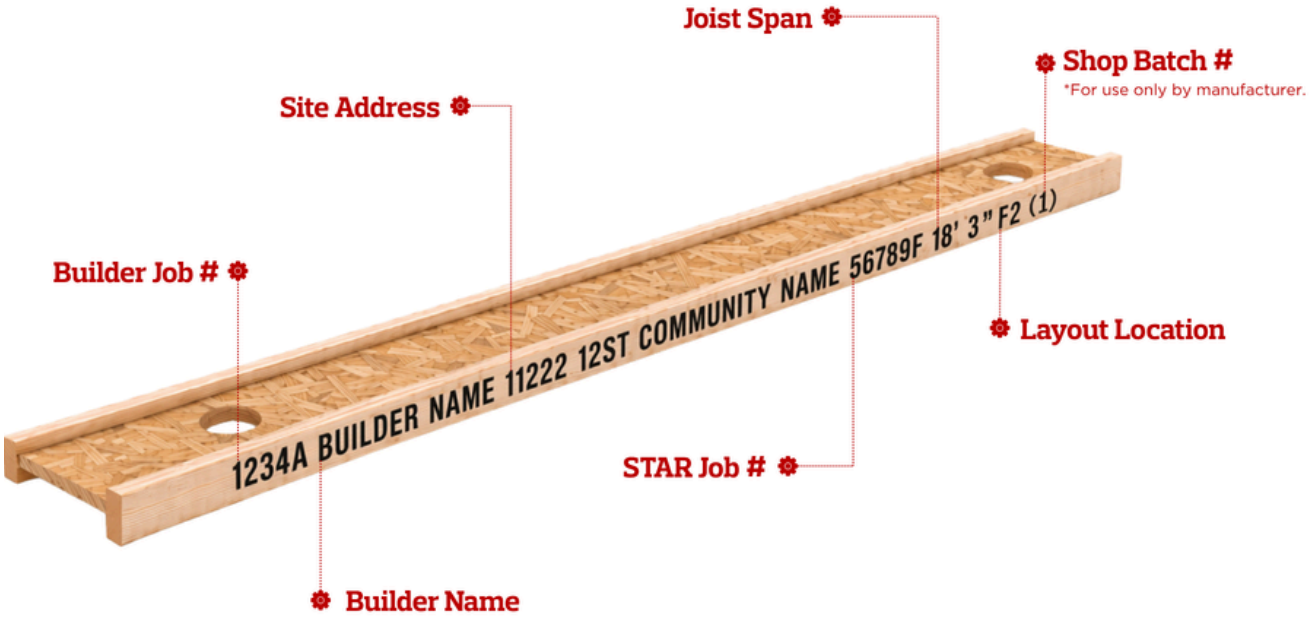
P.E.T. I–Joist

Product Manual & Installation Tips

STAR BUILDING MATERIALS

HOW TO READ LABELLING:

Before cutting or installing joists, please read the inkjet label and cross-reference it with the most current layout (found in the contents of this package). Confirm that the joist is being used in its intended location before making any cuts. This is necessary for every individual joist. Using a joist in the incorrect location, or cutting a joist before confirming its layout position, can result in misused material, leftover joists that do not fit, and incorrectly placed pre-cut mechanical holes. **Always identify the joist first, confirm its location on the layout, and then cut only as required for that specific position.**



For questions or concerns regarding how to read, interpret, or install STAR's P.E.T. joists, or if you cannot locate the joist identified on the layout, please contact your STAR representative for assistance.
